

I need to...	SUN	MON	TUES	WED	THURS	FRI	SAT
<p>Feed (Daily) – Food should be available in cage at all times. Crabs love fresh fruits and vegetables along with commercial pellets or powder. Clean out old veges and replace with fresh.</p>							
<p>Water (Daily) - Make sure that your crab has water to drink and bathe. Provide fresh, nonchlorinated water to drink and a bowl of ocean salt water for bathing. Bowls should be small enough for your crab to climb in and out. You can put a sponge in the bowl as a climbing aide.</p>							
<p>Check temperature and humidity (Daily) - Optimal cage temp should be 75-85° F and 75-85% humidity. If using a tank sponge, make sure it's wet.</p>							
<p>Clean cage (Weekly)</p>
