

_____ 's Care Chart

(my rat)

I need to...	SUN	MON	TUES	WED	THURS	FRI	SAT
(Daily) Keep high quality rodent food available at all times. Offer bite sized veges and fruits every day. Offer occasional healthy table scraps.							
(Daily) Give fresh water.							
(Daily) Rats are incredibly social and happiest in pairs. Best if females are together or familiar males. Rats are curious and love daily time outside the cage to play and exercise. Find a safe space to let them out to run and play and provide cage toys.							
Clean out waste from the cage daily if possible and replace bedding weekly. (do not use cedar or pine chips for bedding)
